**Report Overview:** This publication on the Status of Women in Henderson County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

# The Status of Women in Tennessee Counties

## HENDERSON

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nation-wide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation, female unemployment, and percentages of women in professional or managerial occupations.

- ◇ Women in Henderson County have median annual earnings of \$21,791, but their male counterparts have median annual earnings of \$28,598.
- ◇ 46.9% of the county's labor force is comprised of women, and only 43.5% of women participate in the work force.
- ◇ The female unemployment rate (5.2%) is higher than the overall county unemployment rate (4.5%).
- ◇ Of working women in the county 24.9% are employed in managerial or professional occupations while 21.5% of all employed persons in the county work in management or professional jobs.

### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ About the same percentages of men and women in the county have high school diplomas; however, 10.3% of women in the county have at least a bachelor's degree while only 9.3% of all county residents have a four-year college degree.
- ◇ The female high school dropout rate is almost 15 percent, giving Henderson its lowest county ranking in any indicator.
- ◇ Almost 13 percent of women in Henderson County have no health insurance coverage, and 13.8% of women in the county earn incomes below the poverty level.
- ◇ Though 9.2% of families in the county are in poverty, 29.0% of families with a female householder and no husband present live in poverty in Henderson County.
- ◇ With 14.0% of private businesses owned by women, Henderson County is the lowest-ranking county in the Southwest Tennessee Development District for this indicator.
- ◇ Women represent 51.8% of the county population and 52.9% of eligible voters, yet 5 out of 21 elected county officials are women.

# ABOUT THE COUNCIL AND THIS REPORT

Henderson County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
